

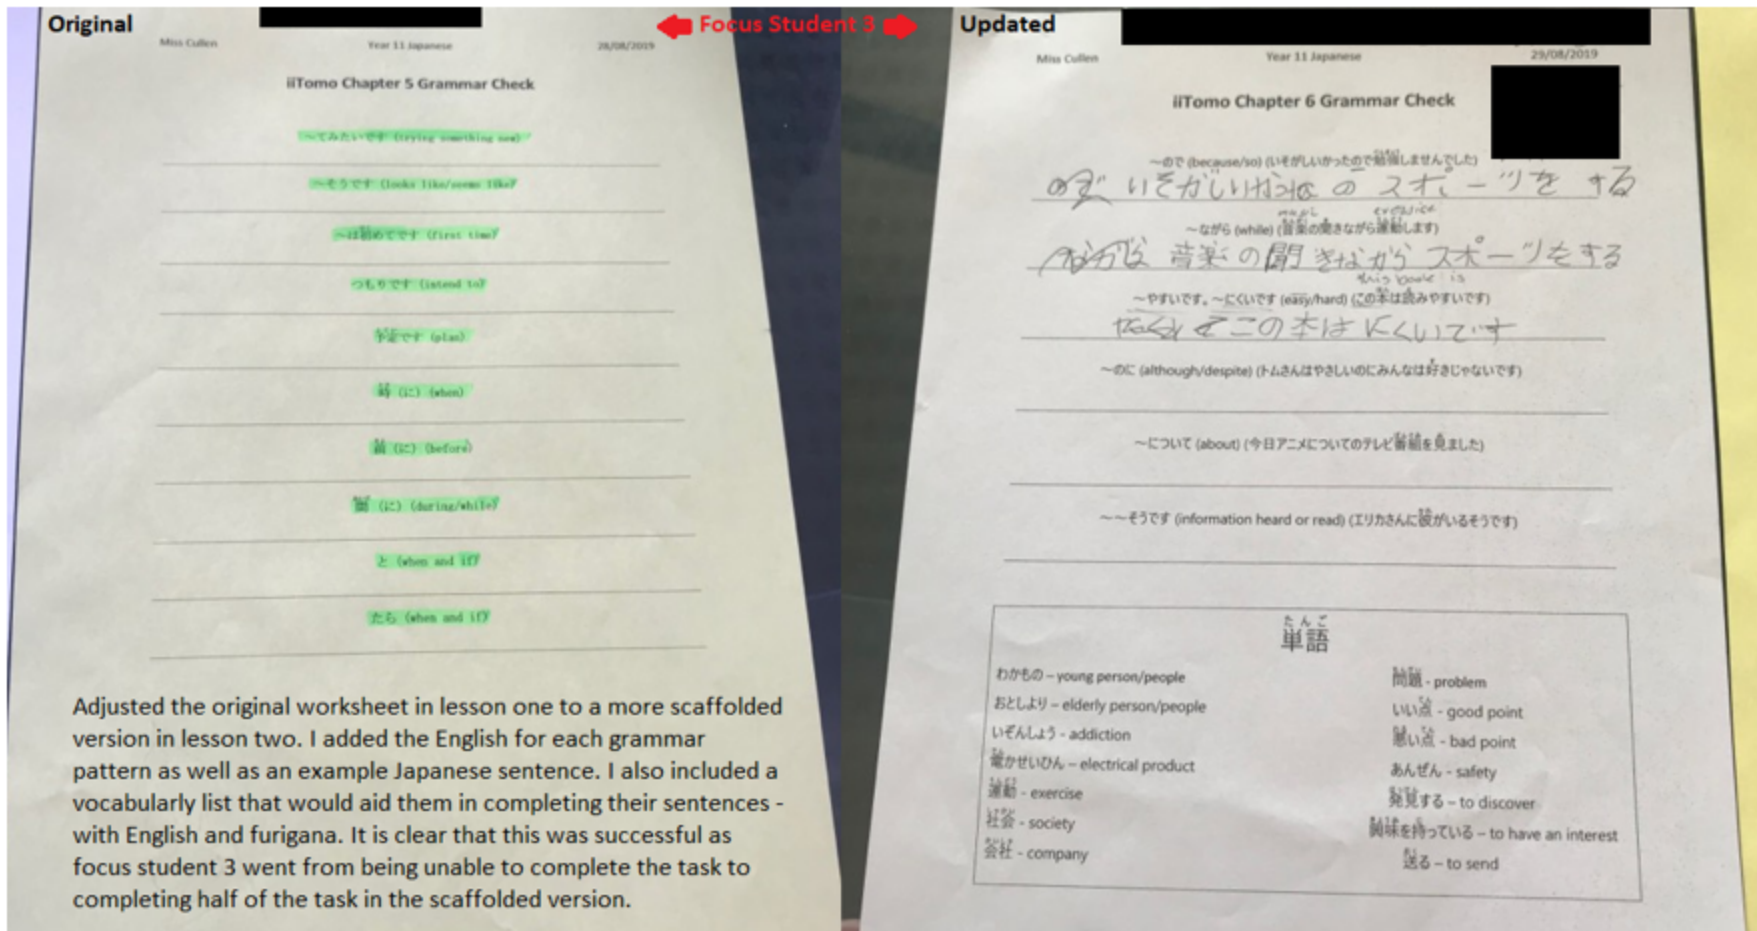

Figure 2.4 – Adjusted and scaffolded worksheet

Adjusted the original worksheet in lesson one to a more scaffolded version in lesson two. I added the English for each grammar pattern as well as an example Japanese sentence. I also included a vocabulary list that would aid them in completing their sentences - with English and furigana. It is clear that this was successful as focus student 3 went from being unable to complete the task to completing half of the task in the scaffolded version.
